VAERS figures and analysis

And what's the deal with myocarditis? And dose relationship? To age… hmmm

Last updated on Dec 10, 2021 · 0 min read

This is where you can find some VAERS analysis - lots of pretty pictures…

This is an R Markdown sheet generated from the VAERS data. For the most part, only figures are shown. I decided to show figures pertaining to Death, Female Reproductive Issues, Breakthrough COVID-19 infections and Cardiovascular and Immunological adverse events.

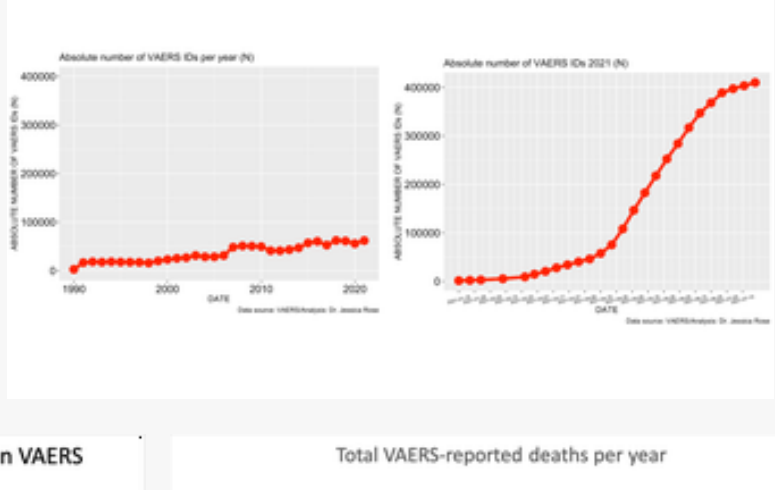
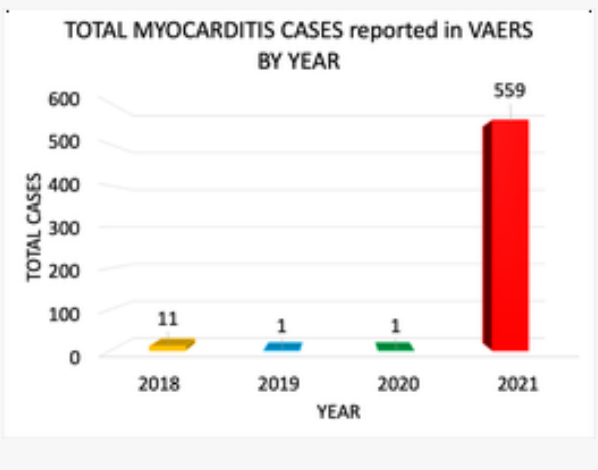
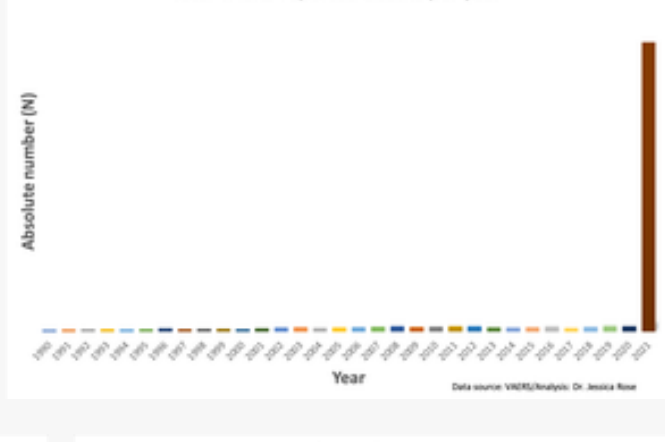
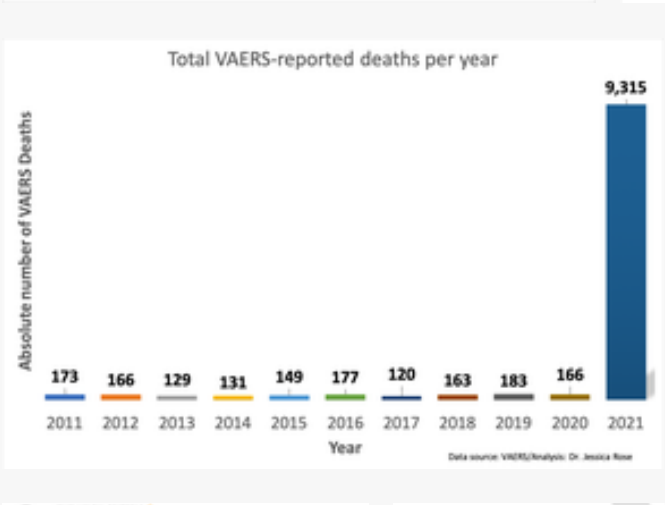
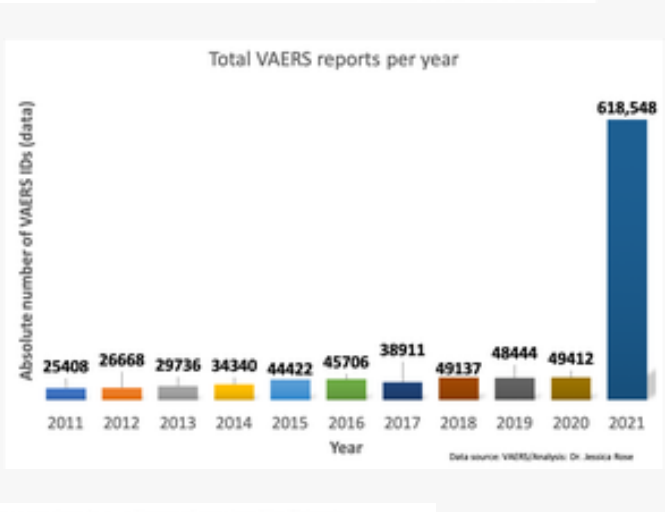
October 2021

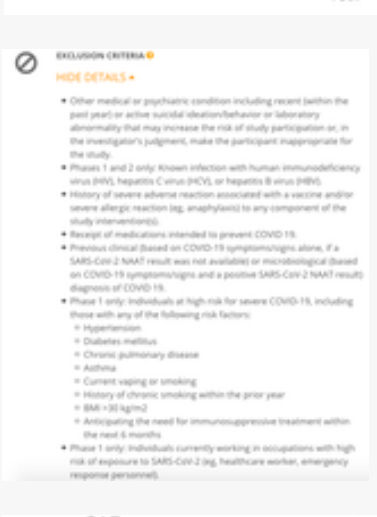




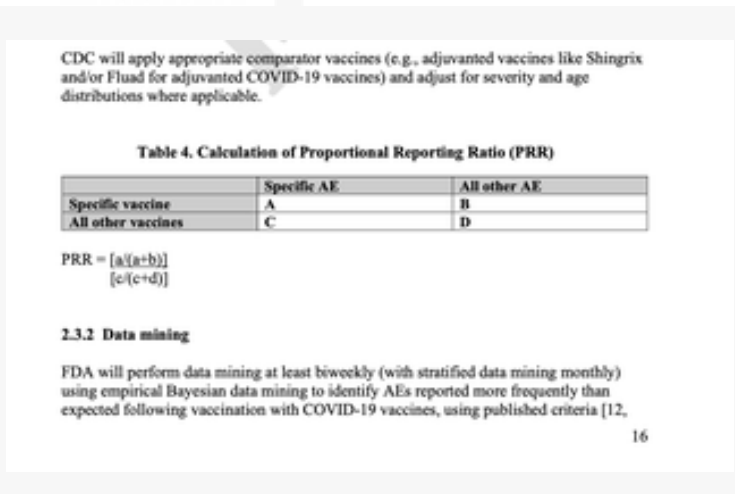








EXCLUSION CRITERIA
HIDE DETAILS



CDC will apply appropriate comparator vaccines (e.g., adjuvanted vaccines like Shingrix and/or Fluad for adjuvanted COVID-19 vaccines) and adjust for severity and age distributions where applicable.

Table 4. Calculation of Proportional Reporting Ratio (PRR)

	Specific AE	All other AE
Specific vaccine	A	B
All other vaccines	C	D

PRR = [a/(a+b)] / [c/(c+d)]

2.3.2 Data mining

FDA will perform data mining at least biweekly (with stratified data mining monthly) using empirical Bayesian data mining to identify AEs reported more frequently than expected following vaccination with COVID-19 vaccines, using published criteria [12,
